DETAILED ACTION

Election/Restrictions

1. Newly submitted claims 31 – 36 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Claims 31 – 33 deal with difference between a power output value and a load value and not necessarily the grid. Moreover, it is disclosed that the master controller prevents the parameter from reaching zero and not necessarily "maintain" such value above a non-zero predetermined value.

With regards to claims 34 - 36, such claims emphasize avoiding an islanding condition and using a master controller receiving a signal and varying the power to maintain a difference between a power generated and the power consumed by a load and establishing that the absolute value of the difference is greater than a predetermined value and being stored by a user.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 31 – 36 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Allowable Subject Matter

2. Claims 1 - 6 are allowed.

The Remarks and amendment field on 03/27/06 are convincing. The prior art fails to disclose, in combination with all the limitations, an engine control system outputting power to a local load and being connected to a grid and having a set point engine power value, a sensor to measure an electrical difference parameter between the engine and the grid and a master controller that maintains the engine electrical power at the engine power output value and varying the engine power value to maintain an electrical difference parameter above a non-zero predetermined value.

Conclusion

3. This application is in condition for allowance except for the following formal matters:

See Election/Restrictions above.

Prosecution on the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO**MONTHS from the mailing date of this letter.
